

Course Overview	Kindergarten Math begins with the exploration and understanding of numbers to 10. In Module 2, students explore two-dimensional and three-dimensional shapes before moving on to comparison of measurement concepts such as length, weight, and capacity in Module 3. In Module 4 students revisit their knowledge of numbers to 10 to decompose and compose numbers to find number pairs. This leads students to their initial work with addition and subtraction within 10. In Module 5 students extend their counting sequence to numbers up to 100 while deeply working with composition and decomposition of numbers within 20 as 10 ones and some more ones. The year is closed out by working on spatial reasoning as students compose and decompose familiar shapes.
